## From Editor's Desk

Sixteen long months of academy life comes to an end. It has been a memorable period for each one of us. Probationers from diverse background representing different parts of country represented a mini India at IGNFA.

Training module has given us a diverse experience ranging from academic to domestic and overseas exposures. Starting from morning PT classes and ending with Games each one of us learnt mutual cooperation, better management skills, interpersonal development with healthy body and mind. Celebration of festivals like Holi, Onam and Ganesh Chaturthi etc. set a unique example of cultural intermingling. Similary cultural performances like Shitotsav, Vashantotsav etc. brought out hidden artistic talent. Living in tents between serenity of nature during Introductory tour, Mensuration Exercise and Working plan made us realise how vital is duty of foresters in enhancing aesthetic happiness public at large.

Tours are the most exciting times of training where each one of us not just understood best practices but also got acquainted with socio-cultural milieu of the country which will help a lot in shaping better administrators. Such exhaustive criss crossing of the country passing through almost every state of the country, starting with West India Tour, Hill Tour, South and Central India tour, East India tour and finally ending with Overseas attachment has definitely made us more knowledgeable and balanced. With diverse attachments and interactions with dignitaries from across the globe has broadened the horizon of ideas and a sense of confidence has inculcated in fellow officers. Government reposes greater trust in us and we hope to significantly contribute in enhancing happiness of masses and glory of nation.

This batch book "स्मृति" glances over these beautiful memoirs and captures some of the best moments spent at IGNFA. We thank Director Dr Sashi Kumar, Course Director Dr P Viswakannan and all faculty members who guided us and made our journey a memorable one. Each one of us hopes this unique bondage further cherishes. Special thanks to team members in conceptualizing and contributing in compiling the batchbook. Finally I thank batch of 2016 for their cooperation and support towards "स्मृति".

IGNFA

सत्यमेव जयते

I am glad to know that the IFS Officers of 2016-18 Course are coming up with a batch book to place their sweet memories of the course in black and white. I am sure this treatise will be a reference point for the anecdotes for the times to come for all of us including faculty.

This is the batch I had full time interaction starting from inaugural of the course till its completion and want to place it on record that the batch is full of talent, zeal and enthusiasm whether indoor or outdoor.

I congratulate the entire team involved in this endeavor and wish all the best to whole of the batch in their respective cadres. I am sure you all shall excel in your respective fields of posting and create a niche for yourself bringing a good name to the service by serving the nation for its posterity and prosperity.

## Dr. P. Viswakannan

Course Director  
2016 Batch

*I deem it a great honor and privilege for having closely associated with IFS 2016 batch during its entire successful journey in this Academy.*

*It's worth mentioning that the batch has the unique distinction of joining a prestigious service, on its 50th glorious year, since its inception as an All India Service in 1966.*

*I'm thoroughly impressed by the exemplary sincerity, commitment and talent seen in every Probationer, in every facet of this training, be it classrooms, outdoors or extracurricular.*

*I'm also of very confident that the every officer of this batch will be successful in setting very high standards of professionalism by being an efficient forest administrator, effective public servant, dynamic officer and above all a good human being. My best wishes to all the officers of this batch for a successful and satisfying- professional and personal life.*

*I am happy to note that his Batch Book- "स्मृति" has come up very well. My best compliments to the entire team for an excellent job.*

# Our Faculty

*One advise that we shall always remember in our career is punctuality and the importance of time. He is "man on time".*

**Dr. Shashi Kumar**  
Director, IGNAFA

*A man of few words and deep thoughts.*

**Shri Ganga Singh**  
Additional Director, IGNAFA

*Technology professor of the academy. Always smiling and fun loving. We thoroughly enjoyed GIS classes which he took. His boldness reflects in breaking conventional old designs and bringing fresh innovations being it teaching style or management*

**Dr. Praveen Jha**

*We had the opportunity of attending his Ecology classes. His in depth understanding and up to date knowledge showed us that "Learning is Forever". You were the first to treat us and expect us to be officers. He always expects only the best from us and also brings out the best from each and everyone in our batch.*

**Dr. Senthil Kumar**

*You made Biometry, Forest Mensuration and Working plan as simple as 1+1 for us. He upholds the pride of being a forester and also instills on us the pride and respect of being a forester.*

**Shri Uttam Kumar Sharma**

*An ardent sportsman, a person who can lead both inside the field and outside very efficiently. Extremely logical when it comes to working plan and forest management.*

**Dr. B. Balaji**

*The true standard for a forest officer is his/her fitness. Anandh sir is an epitome of fitness and infinite energy. We will always fondly remember the morning Runs and practical aspects of people based forestry we learnt from you sir. We will also strive to be as fit as you when we go to our respective cadres.*

**Dr. S.P. Anandh Kumar**

*Very sporty and action oriented person who delivers and rises on the occasions. We will miss his regular reminders and philosophical guidance. Thank you for being our Course Director.*

**Dr. Viswakannan**

*A true senior for all probationers. We will remember the photography lessons and snippets we learnt from you sir. A man who believes field work is the best form of education. You have given us the belief "if we put ur mind to it anything is possible in the field"*

**Dr. Sasikumar**

*The first person on our call lists when we need help and advise from the field. An expert on office procedures and nuances of government service. We always remember your most famous words "This academy is for you and you only". Your energetic smile and positive encouragement to us during the entire course of the training really made life enjoyable at academy.*

**Sh. K. Kannan**

*Though very new addition to IGNFA faculty, her no nonsense personality in exam and jovial nature during interactions will add new dimension to training of fellow juniors*

**Ms. Nidhi Srivastava**

# The Journey.....

*Sixteen months back we all from different parts of the country came together with the intention to be new managers of our natural resources. We had very little idea about what we are going to do. Initially we got overwhelmed by the schedule of Physical Training, Subject Lectures and Games. We often thought scrapping some of the courses will not do harm to us. But then, we were too naïve to fully comprehend the raison d'être for this training program.*

*We soon realized why our society keeps experience of senior generation at higher pedestal than exuberance of younger generation. Everyone learns this eventually, some learn it hard way, some learn it easy way. Thankfully we learnt this in rather easy way in the academy itself. Every part of this training program has been designed for keeping a particular purpose in mind. The training program is reflection of collective wisdom acquired through years of working in the field.*

*Subjects like Systematic Botany, Elementary Biology, Forest Ecology, and Non Timber Forest Produce are designed to acquaint us about the field in which we have to work. Knowing about these subjects will not be enough for us; we also need to learn about how to manage them. Here comes the subjects like Forest Management, Soil Water and Land Management, Biodiversity Conservation and Wildlife Management, Forest and People, Forest Law and Policy etc.. These subjects provided us solid foundation over which we can build edifice of our professional life.*

*We often heard that, "If you can't measure it, you can't manage it." As future forest managers we have to know how to measure the forest resources we are going to manage. We have been introduced to these measuring techniques through subjects like Forest Mensuration, Forest Biometry, Forest Statistics, Remote Sensing and GIS. The subjects teaching are reinforced with practical hands on experience through Wildlife Technique Tour, Forest Mensuration Exercise and Working Plan Exercise.*

*Forest is a living entity and it is imperative that one has to feel it to know it. To fulfill this requirement there is an elaborate program of various tours. If West India and Hill tour acquaint us with forest and wildlife then South-Central India tour, East India Tour and Foreign Exposure visit taught us about management of Forest and Wildlife. Through ministerial and Parliamentary attachments we have had interaction with senior officers and people who matters at policy level. This helped in reducing the awe towards senior officers that existed among us.*

*The apex of our training program was Silvicultural Viva. This is designed to make us revisit and correct any loophole that still existed in our knowledge which we acquired in the academy. This was the last part of our training program. It is now the time for us to go in the field.*

*As much as I've looked forward to this day, I've always disliked endings. There is a universal truth we all have to face, whether we want it or not, everything eventually ends and so is our training period. Today we say goodbye to everything that was familiar, everything that was comfortable. But just because we're leaving that does not mean that we are cutting off from this academy. This academy has become part of all of us.*

*Change is never easy, but it is inevitable and all we can do is to accept this change with all our humility. Whole future and responsibility lie ahead with us. The Journey has just begun.*

# Officer's Mess

- Akash Deep Badhawan

Historically, mess came to refer to a group of people, usually four in number, who sat together at a meal and were served from the same dishes, which soon evolved into a name of any group that ate together. The IFS Officer trainees run their own mess with the elected Mess Secretaries from amongst the officers looking after the overall functioning of the mess and a Mess Duty Officer assigned daily from amongst the batch to look after the daily functioning of the mess. A team of 16 dedicated staff, including cooks, saucier, butlers and cleaners, working around the clock, carries out the working of the mess. The mess also continues to operate on the outdoor exercises of the OTs like Introductory Tour, Working Plan and Forest Mensuration Exercise. The Mess is more of a traditional institution than a mere utilitarian one, for life long bonds of camaraderie are created when one breaks bread with the colleagues.

The Mess is not just limited to the probationers, but it also hosts all the dignitaries and senior officials for high tea or dinner whenever they visit the probationers.

Some traditions of the mess have been carried on since decades and officers from all the senior batches always reminisce the times they spent here during their period of probation.

# Cultural Celebrations

# Sports

- *Sambuddha Majumder*

Imagine a vast, open, field – a perfect carpet of grass so big, it holds a full-sized football pitch, while still leaving room for a hockey ground. A field which accommodates two volleyball courts at one corner and a basketball court at the other. A field with a full length running track, a cricket pitch, multiple tennis courts, a gymnasium, and a beautiful pavilion for fans and spectators. Now imagine all this at your very hostel door – the first sight that greets you in the as you come out of your room in morning.

All this would have sounded fairly unbelievable for most of us probationers before we joined the academy, and yet, there it was – the first incredible sight we were treated to as we set foot in our hostel! It is this field – we were told by our faculty members – that we would miss the most when we left the academy. As we step out of our probation period, we realize how true this is.

More than anything else, it is this field which has moulded us – physically as well as mentally. It is in this field that many of us rediscovered our childhood passions – football, cricket, hockey, tennis...you name it! It is this field which has helped us transform from somewhat chubby and generally lethargic bunch of studious characters to the fit, active and tough officers that the nation needs to manage its forest areas! It is this field, in which we held so many competitions and tournaments, which has given us the passion to compete and excel – to take both victories and defeats in our stride. It is this field, which has shown us the true value of believing in each other, bonding with each other – and to forever evolve, both as a team, as well as in our individual capacities.

# Introductory Tour

- Sambuddha Majumder

*"It's not what you look at that matters, it's what you see.", said Henry David Thoreau, the famous American naturalist-writer. And although he was talking in a more general sense when he wrote this, he might as well have been talking very specifically about the first tour in our curriculum – the Introductory Tour.*

*Scheduled strategically, just before the beginning of our more extensive country-wide tours, the Introductory Tour was all about moulding the way a young probationer sees a forest. Conducted in the neighbourhood of Dehradun – in a beautiful Sal forest near the village of Timli – the tour involved a closeness with nature rarely experience by most of us before. Staying in tents for more than a week and guided by our faculty members, we learnt about the ground realities of many of the things we had read so far only in books – handling of field equipment, how to track and identify wild animals, birds and trees and most importantly, becoming familiar with our forest-related infrastructure and field administration.*

*While all of us had seen and appreciated the beauty of the forest before, this tour made us see the hard work that goes on behind the scenes to maintain that splendour – guards on constant patrol on beats of several kilometres, engaging with the local communities who depend on forest resources, preventing soil erosion through watershed structures, watchtowers to maintain vigil over forest fires and illegal felling of trees – and all this deep within the forest, on very tough terrain.*

*Of course, this tour was not all about learning the hardships of working in the forest. We also realized the major perks of working as a forest officer – long walks along beautiful forest streams, freshly cooked dinner around bonfires, playing volleyball in the fresh air of the forest, lively evening discussions with our tent-mates, and of course, tea and maggi with the local villagers – a typical day in the life of a forester!*

# West India Tour

- Chesta Singh

*First forestry tour of the batch showed us the diversity of beauty, from magnificence of Tajmahal to the grandeur of Rajasthan coupled with coastal beauty of Jamnagar and bumpy camel rides on deserts of Jaisalmer. The gigantic lion of Gir and roaring tigers of Ranthambore were as exciting as were the chirping birds of Bharatpur. This memorable tour brought us close enough to develop bonds for eternity.*

# Mensuration Exercise

- Arun Vignesh

*Wealth of a forest is measured by the health and size of the timber it yields. Each year, probationers from IGNTA visit the magnificent Deodar forests of Kanasar to learn the knowhow of measuring parameters of a tree. Probationers of 2016-18 batch left for the week long exercise on 14th May, 2017. After the treacherous journey past steep slopes and dangerous mountain roads, the sight of Kanasar base camp was a bliss. Seated amidst the mighty deodars, our tents were filled with wafts of deodar fragrance. The next two days were for intensive field observations and measurements. Watching the felling of mature Deodars and feeling the ground shake on their fall, proved the mightiness of nature and the awe it inspires. The next few days were for intensive battle with numbers and graphs. The probationers could be seen huddling together, discussing their calculations and some magnificent souls teaching the rest. Beyond these hectic works, we were kept on our feet, literally, when a sudden flash flood drowned many tents. The treks amidst the rain, the walks to the nearby village, the frequent game of cards, soccer or volleyball, the pristine night sky with nil light pollution made our hectic work schedule much more enjoyable and more importantly, memorable. With the final report submission and viva, we wound up the exercise, leaving Kanasar much happier and even so wiser.*

# Hill Tour

- Gaurav Garg

*The IFS probationers had their Hill Tour covering 5 states and 11 cities , within a short span of 22 days from 26 May 2017 to 16 June 2017. The Hill tour was one of the most awaited tour, due to its unique landscapes, the iconic Himalayas, road trip across the highest passes of the world, the cold deserts. It was like a journey to the heaven, while escaping the summer heat of Dehradun.*

*The probationers got exposure to some unique aspects of forestry, like , Local Community based eco-tourism model in Leh and successful management of Man-Animal conflict caused by Snow leopard in the region. The involvement of religious leaders and monasteries in making guinness world record plantations a success even in the cold desert of Leh was remarkable learning. The most exciting part of the tour was observing the landscape and vegetation contrast while travelling by road , to KhardunLa pass on the highest motoable road of the world, to the Pangong Lake and its saline water.*

*In addition probationers learnt about Resin tapping methods by the forest department in Himchal Pradesh, agroforestry in Punjab and Haryana, NTFP based cooperatives supported by the forest department, Cloning industries for the eucalyptus plantations raised by farmers, Modern Zoo management in Chhatbir Zoo – Punjab, Water Catchment Area in Shimla, Medicinal Plant Parks and Nurseries in Haryana, Punjab and Himachal Pradesh. The probationers also got a chance to visit the World famous Vulture Breeding Centre in Pinjore, Haryana.*

*The most exciting part of the tour was the Aerial Surveying of forests through paragliding in Palampur, Himachal Pradesh. Even the journey between Cold desert of Leh to the Pine and Deodar forests of Himchal Pradesh was by road, and amidst snow storms and exposure to some unique flora, fauna and natural landscapes.*

# Parliamentary Attachment

- Akash Deep Badhawan

*The bureaucracy has always functioned in close tandem with the political setup; in fact the executive has always been the supporting and implementing mechanism to the legislature. It becomes only logical to introduce the young bureaucrats to the functioning of the legislature and introduce them to the politicians so that they can get gain the insight into the ideas that need to be implemented by them on the field. Also, the young minds are rather fresh and have a tabula rasa, that can be instilled with a more positive aspect of the interaction between the legislature and executive right at the formative stage of their careers.*

*Such a week long interaction was organised by the Bureau of Parliament studies which was meant to give an insight into the functioning of the parliament and how discussions on the country's policies take place at the highest level. We had interactions with the Members of Parliament and senior officials from the Lok Sabha secretariat who shared their insight into the functioning of the Legislative setup.*

# NPA Attachment

- Gaurav Garg

Nestling amidst verdant hills and astride the Hyderabad-Bangalore highway, eight kilometers away from the historic city of Hyderabad and spread over about 277 acres of land, is the permanent abode of the Indian Police Service (IPS) - Sardar Vallabhbhai Patel National Police Academy (SVPNPA), the premier police training institution in the country.

After Independence, Sardar Vallabhbhai Patel, the first Union Home Minister emphasized the importance of having a ring of services which would keep the country intact under a Federal Constitution. He said, "...the Union will go, you will not have a united India, if you do not have a good All India Service, which has the independence to speak out its mind...".

The probationers of the 2016 batch were given exposure to multiple dimensions of Wildlife Crime Detection and Mob Management. The program was a 5 day residential program. The classroom sessions had eminent speakers to discuss multiple topics of relevance like Wildlife Acts, immediate response to crisis situations, Mob management, Media Management, Wildlife Forensics, Cyber Crime and Mobile based tracking, Left Wing Extremism and police-forest departmental cooperation and Improvised Explosive Devices (IEDs). Probationers also learnt through practical sessions of, mock crime detection session, pistol firing and jungle survival techniques. A visit was also organised to CSIR- Centre for Cellular & Molecular Biology (CCMB), where techniques relating to DNA fingerprinting and forensics relating to animal crimes were discussed. Apart from the classroom sessions, there was PT, Aerobics, Gymming in the morning and various outdoor games within the academy each evening. The IFS probationers also got an opportunity to interact with their IPS counter parts and a formal dinner together was hosted for the IFS officers in the IPS.

# Valley of Flowers

# Wildlife Technique Tour

- Rajeev Ranjan

*We have often heard that "If you can't measure it, you can't manage it." This tour in Panna Tiger Reserve was all about measuring wildlife through on field exercises. The excitement of going early morning to collect evidence of wildlife through sign survey, the sensation to get an encounter with majestic tiger, the expectation to get animals in our Camera trap and seeing the result of your own work at the end of day calculation was remarkable experience. We learnt that to understand the rule of Jungle you have to be in the Jungle.*

# South & Central India Tour

- Rajeev Ranjan

*Perhaps the longest tour in terms of distance; it'll be remembered for the everlasting ties forged through multiple train journeys. Having been acquainted with forest and wildlife in West India tour and hill tour, it was time to learn about management of Forest and Wildlife in South and Central India tour. We found it amazing how diversity of eco-climatic zone changes the management priority. If it was management of MFP in central India, the learning shifted to management of PAs through EDCs in South India. Travelling from hot and dry deciduous forests of Central India to warm and humid climate of Gulf of Mannar, to pleasantly cool weather of Western Ghats, we certainly emerged out as much better forester.*

# Working Plan Exercise

- Mandeep Mittal

*Our batch did the working plan exercise in pristine Sal forests of Timli. We stayed in camps for nearly ten days. Almost everyone was apprehensive as to how we would spend ten days in camps away from the comfort of our academy hostel rooms without electricity, without constant connectivity on cell phones, internet and laptops. But it turned out to be a great experience.*

*Numerous nights spent around the campfire discussing yield, Von Mantel and Cotta are still etched in our minds. We will cherish those cold nights, sound of birds and trees swaying in the wind, piping hot chai at the dhaba, maggi in the evening and awesome food prepared by the mess staff. This exercise was a balanced mix of learning and fun. All the courses ranging from biometry to silvicultural practices came in handy while doing this exercise. We spent many days inside the forest collecting data. The entire batch wearing field uniforms armed with calipers, khukris, range finders moving into the jungle in the morning was a sight in itself.*

*The afternoons and evenings were spent playing Volleyball or card games. Not only the probationers but the faculty members also had a great time in Timli. Uttam Sharma Sir's constant guidance was vital in getting the reports done in time. Everyone dreaded the final viva but the entire batch did very well and impressed the external examiners.*

# East India Tour

- Arun Vignesh

*Visit to the far east and the islands of the nation forms part of field learning for the probationers from IGNFA. Divided into two groups, the probationers of our batch left for the final domestic tour on 12th January, 2018. While the adventurous road trips of Arunachal Pradesh and smooth boat rides of Sunderbans exemplified the duality of nature, we found balance in the serene beauty of Meghalaya. With a multitude of safaris inside Kaziranga, we enjoyed the sightings of One-horned Rhinoceres and Wild Water Buffalo. Then followed the fun filled visit to the Andamans. Awestruck by the beauty beneath the waters, almost all of us fell in love with the island of Havelock. Travelling through the Jarawa reserve to see the Olive Ridleys nesting was altogether a unique experience. In the final leg, the Soul of Incredible India - Odisha - greeted us with the biodiversity it harbors. The sightings of Irrawaddy Dolphins, Crocodiles and plentitudes of Kingfishers marked the perfect end to the perfect Tour. Traveling through a collage of cultures, the East India Tour showed us the reality that India is One made of Many.*

# Foreign Tour

## Estonia , Finland and Russia

- Mandeep Mittal

*The batch was divided in two groups – one group went to Russia and Finland and the other went to Spain and Italy.*

*Finland and Russia group – It was the first time that many of us were going abroad. So naturally there was a lot of excitement. With our official white passports in hand and huge suitcases packed with woolens and haldiram namkeens and matthis we boarded the Air India flights.*

*On reaching Finland we understood the true meaning of the world COLD. It was freezing out there. There was snow as far as the eye could see. When it comes to technology Finland is a world leader. We learnt a lot about the use of technology in forestry sector. Indian restaurants are hard to come across in Finland. So people among us who don't even know how to hold a knife turned chefs and tuned out delicious dishes from dal chawal to chicken curry. The adventurous souls in the group got the opportunity to do ice hole swimming and ice rolling. Two things to which Finland can legitimately stake claim is the Sauna and Santa Claus. Although we could not meet the Santa but we sure did get an ample opportunity to enjoy the sauna.*

*Everything we had heard about Russia came out to be true. It is bestowed with natural beauty (pun intended). People are warm and friendly and they fondly remember bollywood songs of Raj Kapoor era. The architecture of St. Petersburg and Moscow is breathtaking. Streets of these cities offer everything from small souvenirs to high end fashion brands. All of us wished we had more time in Russia. A few days is not enough time to explore the rich cultural and natural heritage of this beautiful country.*

## Spain and Italy

- Rajeev Ranjan

*Henry Miller once said that "One's destination is never a place, but always a new way of seeing things". Our foreign exposure visit to Spain and Italy has been organized to expand our datum of seeing forest and its management through entirely different perspective.*

*The spread of urbanization in these countries are massive. When we reached there, then only we realized what Urbanization actually means. The cities like Madrid, Valencia and Barcelona are big and seem to be well planned. The view that we got form visiting these cities are that, they have utilized their lands very efficiently, where there should be Jungle there is Jungle, where there should be City there is city. Every city seems to treasure its culture. If the old city of Quenca provides the historical witness of standing against invaders, then city of Albarracín is the example of great mixture of Islamic and Christian culture. We find every city has some history to tell only thing is that we need to listen to them carefully.*

*Our destination stations were spread across the country. We have been fortunate enough to travel through different climatic zones, from the Cold areas of Segovia and Valladolid to warm coastal areas of Valencia and Barcelona. These journeys have become memorable for every one of us. During these journeys we realize why it has been said that "there is more fun in Journey than Destinations".*

 and ask him to walk to hell. He would reply "  
 aagey hum jayenge,tum peechey se  
 aana".Never says no because there is  
 nothing which he can't do. Bas shadi karwa  
 do yaar koi iski nhi to bahut Kasht dega ye  
 logo Ko...
